MORNING LEADER OFFICE, 1 HORNING LEADER OFFICE, 1 HORNING LEADER OFFICE, 1806. The Gold market in New York to-day was very auch nusettled, and flortuations were rapid withn a range of two per cent. The operations of the bears who is is reported worked hard, by putting ont large shorts and otherwise, to work the mar-ket down, were not successful, and a resolion was finally ell cted, though apparently mithout any great doctor of firmness. The rate this morning ened at 125%, and closed at the Second Board at it. At Gallagher's Evening Exchange the price pened at 131% and cleard at 13.3%. The adva of gold found no sympaty in the p oduce markets which continue to decline for all leading staples. be general Stock market opened weak and debears, but subsequently recovered somewhat, and under the selvance in gold closed firmer. Governof the non-realization of the advance expected in Europe This advance, however, will unquestionably occur, and though it may not be expedient to at licipate it, there is no reasonable ground for a dictine from the present prices for Government gold securities Commenting upon the stock mar-ket, the New York Herald says Western ratiroads have a weak financial hold of capitalists. Their annings for April show a large failing off, owing chiefly to the decline of prices for produce, which occasionies a chesper means of transit.

The local m ney market continues quiet so far as the d mand from borrowers is concerned. The liversion of money for investment in the Seren-trivies, however, is being felt upon currency balances, though the market is still sufficienty supplied for all the present contingencies of trade -Eas ern Exchange is more pleaty, and selling rate o canior.
